IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER FAILURE TO MONITOR

**ESTE INFORME CONTIENE INFORMACIÓN IMPORTANTE ACERCA DE SU AGUA POTABLE. HAGA QUE
ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO ENTIENDA.**

Monitoring Requirements Not Met for Mapleton Municipal Water Authority

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 1st Quarter of 2023 we failed to monitor for the following contaminants and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, the required sampling frequency, how many samples we took, when samples should have been taken, and the date on which corrective action samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
Haloacetic Acids (HAA5)	Quarterly	1	March 15, 2023	March 9, 2023
Total Trihalomethanes (TTHM)	Quarterly	1	March 15, 2023	March 9, 2023

What happened? What was done? When will it be resolved?

The Mapleton Municipal Water Authority is required to monitor for Total Trihalomethanes (TTHM) and Haloacetic Acids (HAA5) on a quarterly basis during the period of March 15, 2023. Samples may be taken within 3-days of the date specified. Samples for TTHM and HAA5 were collected on March 9, 2023, which is outside of the required monitoring period (plus or minus three days from March 15, 2023). The Authority will work to comply with monitoring requirements for disinfection by-products. This problem was corrected by complying with monitoring requirements for disinfection byproducts during Quarter 2 of 2023.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

For more information regarding this notice, please contact Cheryl Woods at 814-542-3293.
